PATRICK KIPROP

Full-Stack Software Engineer (PHP Specialization)
Addrress: Eldoret , Kenya
Phone: 07933176819
Github: GitHub: kanakata
Email: patrick37668@gmail.com

PROFESSIONAL SUMMARY

High-performance **Full-Stack Developer** specializing in **Pure PHP** architecture and custom system design.
Expert in building secure, scalable applications without the overhead of heavy frameworks.
Proven track record in Fin Tech **integration (M-Pesa Daraja)**, automated institutional work flows, and security-first development.
Deeply committed to **Clean Code (SOLID)** and **Object-Oriented Programming (OOP)** to solve complex business logic.

CORE TECHNICAL PROFICIENCIES

- **languages:** PHP (Pure/Vanilla), JavaScript (ES6+), SQL, HTML5, CSS3, Sqlite.
- **Frameworks:** laravel 13x.
- **Libraries:** chartjs for business inteligence projects, php ml for ai targeted content serving.
- **Architecture & Patterns:** MVC (Model-View-Controller), OOP, SOLID Principles, Dry Logic.
- **Backend & Security:** Brute Force Mitigation (Rate Limiting/Hashing), Session Management, Password Security, SQL Injection Prevention, Base64 Data Masking and content encryption.
- **Fast and efficient code:** Low ram consumption and fast process speeds.
- **Tools & DevOps:** Composer (PSR-4 Autoloading), PHPUnit (Unit Testing), .env Management, Git/GitHub, Linux Server Environment.
- **APIs:** Safaricom M-Pesa (C2B, STK Push, Callbacks), RESTful API Development.
- SEO-optimized routing.

PROFESSIONAL EXPERIENCE

Lead Developer at :
Clear-pass (Startup) Nairobi*, Kenya (Remote)*
Project: Automated Student Institutional Clearance System *Developing a comprehensive digital clearance platform for institutions to eliminate manual paperwork and overhead cost of locomotion to fetch clearance papers.*
Link: []

- **Custom MVC Engine:** Built a proprietary PHP MVC framework from scratch to ensure ultra-fast performance and total architectural control.
- **Fin-tech Integration:** Architected a robust payment module using **M-Pesa Daraja API**, automating fee clearance through real-time STK Pushes and secure callback handling.
- **Work-flow Automation:** Digitized muti-departmental approvals (Finance, Library, Labs) with automated status updates and certificate eligibility logic.
- **Middle-ware implementation:**
- **Security Engineering:** Implemented advanced **Brute Force Mitigation** strategies and secure authentication hurdles to protect student records.
- **UI/UX:** Created a dynamic user interface with custom JavaScript, featuring interactive data filtering and a system-wide Dark Mode.

TECHNICAL PROJECTS

E-commerce website * Designed a secure fast and reliable e-commerce platform for multi-product selling with **stripe** and **m-pesa** integration as payment methods.
E-**Custom Blogging Platform (pegpem)** * Engineered a high-speed blogging engine with dynamic category filtering and SEO-optimized routing.

EDUCATION & CONTINUOUS LEARNING

Independent, project-based mastery focused on deep-dive engineering.

- **Advanced Web Development & PHP Architecture:** Specialized training via php and laravel official documentation, **W3Schools**, **BroCode**, and **Dani Krossing**, **Laracast** focusing on:
    - Advanced **Object-Oriented Programming (OOP)** in PHP.
    - **Database Normalization** and **Advanced SQL**.
    - Custom **mvc** stracure development.
    - Clean Code practices and Design Patterns.
    - **Sql best practices** and **database optimization.**
- **Terminal Testing:** Implementation of custom code tests via terminal to ensure smooth running of implemented code.

- **Automated Testing:** Implementation of **PHPUnit** for ensuring code reliability in production environments.

KEY STRENGTHS FOR LOCAL AND INTERNATIONAL REMOTE ROLES

- **Time Zone Compatibility:** Located in **GMT+3**, offering high overlap with European and Middle Eastern teams.
- **Framework Agnostic:** Able to jump into any PHP environment (Laravel ,Codeigniter) or maintain complex legacy systems due to deep "Pure PHP" knowledge.
- **Security Mindset:** I build with the assumption that the system is under threat, prioritizing data sanitization.
- **Fast Shipping:** I Work to make sure that code is available for production in time.
